DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-7, 14-20, 28-30, 36 and 37 are drawn to a kit and composition comprising a polypeptide having ribonuclease activity, classified in class 435, subclass 6.
 - II. Claims 8-13, drawn to method for synthesizing a nucleic acid molecule, classified in class 435, subclass 91.1.
 - III. Claims 21-27, drawn to a method for sequencing a nucleic acid molecule, classified in class 435, subclass 6.
 - IV. Claims 31-35, drawn to a method for amplifying a nucleic acid molecule, classified in class 435, subclass 91.2.
2. The inventions are distinct, each from the other because of the following reasons:
3. Inventions I and II through IV are related as product and processes of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product of group I, a kit or composition comprising a

Art Unit: 1652

polypeptide having ribonuclease activity can be used for each of the different methods of groups II, III and IV, drawn to synthesizing, sequencing and amplifying a nucleic acid, respectively.

4. The methods of Groups II-IV are independent as they comprise different steps, utilize different products and produce different results.

5. Because these inventions are distinct for the reasons given above and the search required for Groups I-IV is not coextensive, restriction for examination purposes as indicated is proper.

"For purposes of the initial requirement, a serious burden on the examiner may be prima facie shown if the examiner shows by appropriate explanation either separate classification, separate status in the art, or a different field of search as defined in MPEP 808.02." (see MPEP 803).

6. A telephone call was made to Robert W. Esmond on 9/15/2000 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
